### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6, 8-11, 14, 15, 17, 21-23, 25, 29-35 rejected under 35 U.S.C. 102(b) as being anticipated by Rizzuto (U.S. 5,100,710).

See Figures 2 and 4, the abstract and col.2, lines 15-30. The reference teaches a bib with an absorbent outer layer and an impermeable inner layer with a hole for a person and flaps around the hole.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 1772

4. Claims 5, 7, 12, 13, 16, 18, 19, 20, 24, 26, 27, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rizzuto (U.S. 5,100,710) further in view of Fenninger et al. (U.S. 4,458,364).

Rizzuto teaches a bib with an absorbent outer layer and an impermeable inner layer. Fenninger et al. teaches an extension of an inner impermeable layer (element 10) to form a collar flap. The instant invention claims a bib with an absorbent outer layer and an extension of an impermeable inner layer. It would have been obvious to one of ordinary skill in the art to have extended the inner layer of Rizzuto in order to form a collar flap because of the teachings of Fenninger et al. Choice of impermeable plastic material and absorbent material from those known in the art is taken as being within the ordinary skill of the art, as is the selection of a joining means such as a pin or Velcro for the flaps.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The other references also teach absorbent top layers.
